Coldness in Personality Prevents Dalton Being Hero of Co-Workers

This is the last in a series of dispatches on personalities in the new British Labor Government—EDITOR.

By CHARLES T. HALLINAN
Exclusive to The Edmonton Bulletin
LONDON, Aug. 7.—(BUP)—Hugh Dalton is an Englishman, a student of Italian literature and Britain's new chancellor of the exchequer.

The 38-year-old Dalton, like several of his Labor cabinet colleagues, has never been noted for popularity among the party rank and file.

He has been active in the party for about 25 years and has always been prominent, but a coldness in his personality has prevented him from becoming a hero of his co-workers.

SON OF CLERGYMAN

Dalton is one of several Etonians in the new government. He is the son of a Church of England canon and was reared at Eton and King's College, Cambridge. His background was upper middle class but he became a convert to Socialism in his twenties.

Dalton's chief preoccupation has been problems of administration. He is a member of the party's right wing which believes that British parliamentary machinery is strong enough to accommodate itself to a large amount of nationalization of industry without undue strain.

His new cabinet post will be charged with responsibility for finding the funds with which to carry out the large new social programs which the Labor party has in contemplation.

NOT A CRUSADE

He has been identified with the London School of Economics and associated with Prof. Harold Laski and Dr. R. H. Tawney, who have never taken the crusading economic positions which they advocate.

In the Churchill coalition government he held the post of minister of economic warfare, a position which was conceded to have proved himself a capable director of a complex and difficult assignment.

He is the author of a large number of works dealing with economic questions, including "Practical Socialism for the Worker." There has been some speculation that at a later date he and Ernest Bevin, foreign secretary, may trade posts.

Allies Now Across Old Sittang River

CALCUTTA, Aug. 7.—(CP)—Patrols of Empire troops have thrust across the old Sittang river channel at a point 60 miles northeast of Rangoon in Southern Burma, while other forces battled to wipe out Japanese remnants still trapped west of the river, the southern Asia command announced yesterday.

The patrols crossed the channel south of Aungmye and probed enemy strength. The Burma fighting in the Sittang area has been an enemy more than 10,000 dead in recent weeks, and virtual destruction of the Japanese 20th Army.

Other forces operating in flooded jungle areas between Myittha, 70 miles northeast of Rangoon, and the river's bend met continued resistance, a command source said.

Surplus Permits Release of Many Nurses in Army

OTTAWA, Aug. 7.—(CP)—A surplus of nurses in the Canadian Army Medical Corps following the end of the war in Europe has made possible the release of a considerable number of army nurses, defence headquarters announced yesterday.

Effective at once, any army nurse may make application for return to reserve status or retirement.

In addition the following classes of nursing sisters may be retired or returned to reserve status: all married officers, all unmarried officers subject to restricted postings on compassionate grounds, and all officers with a priority release order of 10 or less, provided they have completed a year in the service.

Prime Minister Believes Victory Over Japan Near

OTTAWA, Aug. 7.—(CP)—Prime Minister Mackenzie King yesterday urged delegates to the Dominion-Provincial Conference a statement describing Canadian participation in the development of the atomic bomb used for the first time on Japan.

Earlier, in his address opening the conference, Mr. King had spoken of the continuing war effort and the resolution of the Canadian people to contribute to the defeat of Japan.

He said: "The day of final victory over Japan is coming surely, and we believe we are near it."

Crack Yank Flier Killed on Flight

BURBANK, Calif., Aug. 7.—(AP)—Major Richard O. Brown, an American fighter pilot, was killed yesterday as his jet-propelled P-50 Mustang was blown into bits by an explosion a few minutes after he left Lockheed air terminal on a test flight. The aircraft, who had 24 Japanese planes in his credit, apparently made an attempt to land through the pilot's escape hatch. His parachute had been partly opened.

Age of Atomic Force Realized On July 17 Last

Continued from Page One
atom from the beginning of time."

The blast elevated the steel tower windows in homes as distant as western Alberta.

At Albuquerque, 120 miles away, a blind girl, when the flash of the light lit the sky before the explosion could be heard, asked, "What was that?"

Thunder delayed the test an hour and a half and blotted out aerial observation.

The lookout point was set up six miles from the steel tower from which the experiment took place. Key figures in the experiment took their positions nine miles away. They were ordered to lie down with their heads away from the blast tower.

FINAL ASSEMBLY
Final assembly of the atomic bomb had begun the night of July 12 in an old ranch house. Various component parts were assembled from distant points and put together there.

On Saturday, July 14, the unit which was to determine the success or failure of the entire project was elevated to the top of the steel tower. All that day and the next, the job of preparation went on. In addition to the apparatus necessary to cause the detonation, complete instrumentation to determine the "pulse beat" and all reactions of the bomb was rigged on the tower.

At the appointed time there was a blinding flash lighting up the whole area brighter than the brightest daylight. A mountain range three miles from the observation point stood out in bold relief.

TREMENDOUS ROAR
Then came a tremendous sustained roar and a heavy pressure which shook knocked down two men inside the control centre. Immediately thereafter, a huge multi-colored swirling cloud boiled to an altitude of more than 10,000 feet. Clouds in its path disappeared soon the shifting substructure was discernible in the now gray mist.

The test was over, the project a success.

The steel tower had been entirely vaporized. Where the tower had stood there was a huge sloping crater.

Mr. Gen. Leslie R. Groves, head of the atomic bomb project, gave this description:

GIVES DESCRIPTION
"First came the burst of light of a brilliance beyond any comparison. We all rolled over and looked through dark glasses at the ball of fire. About 40 seconds later came the shock wave followed by the roar, neither of which was as startling as the extraordinary lighting of the interior."

"A massive cloud was formed which surged and billowed upward with tremendous power, reaching the substructure at about five minutes."

"Two supplementary explosions of minor effect after the lightening occurred in the cloud shortly after the main explosion."

"The cloud travelled to a great height first in the form of a ball, then mushroomed, then changed into a long trailing chimney-shaped column and finally was sent in several directions by the variable winds at the different elevations."

NORTHERN ENGLAND OIL
LONDON.—(CP)—Licences have been granted to a British company in prospect for petroleum in two areas in Lancashire, Yorkshire and Durham. Largest British oil strike before the war was in Nottingham where present yield from the wells is 370 tons of oil a day.

Mr. King was offered the Liberal nomination in Glangtry after he was defeated in Prince Albert in the general election. Dr. W. B. McDiarmid, who had been elected

Yesterdays test returned Mr. King to the Commons for the eighth time. Dr. Monahan had campaigned in Glangtry but Mr. King had not returned to the riding since he attended the national meeting of local Liberal association.

Dr. Monahan said in his campaign that he was contesting the seat in order to make a fight out of an election that was "too cut and dried."

Seek to Improve Radio Broadcasting

CALGARY, Aug. 7.—(CP)—Joint representations to parliament by the Canadian Broadcasting Corporation and the Canadian Association of Broadcasters aimed at improvement of the radio broadcasting setup in the Dominion was suggested yesterday by Glen Battelman of Toronto, C.A.B. president.

"Whether or not the position of the C.B.C. is such that co-operation in seeking new legislation is impossible, I do not know," said Mr. Battelman in addressing the annual meeting of the Western Association of Broadcasters.

Mr. Battelman, 120 miles away, a blind girl, when the flash of the light lit the sky before the explosion could be heard, asked, "What was that?"

Thunder delayed the test an hour and a half and blotted out aerial observation.

The lookout point was set up six miles from the steel tower from which the experiment took place. Key figures in the experiment took their positions nine miles away. They were ordered to lie down with their heads away from the blast tower.

Development of New Bomb One of Top War Secrets

OTTAWA, Aug. 7.—(CP)—Technical phases of the new discovery still are shrouded in mystery, but it is expected some elementary explanation will be made by the National Research Council, which has had an important part in the scientific program, later this week.

Even among the capital's highest authorities little was known of the research program. Some cabinet ministers got their first definite information from Mr. Howe after he had made his public announcement.

In Mr. Howe's own department there were only one or two top officials who knew the full story. At the Chalk River plant even engineers were said to be baffled by what was going on. Extreme precautions were taken when equipment was delivered and the plant has probably the highest ratio of police to workers of any Canadian war plant. In the Chalk

Urges Strict Control Of Uranium Supply

HOUSTON, Tex., Aug. 7.—(AP)—Science and control of the world supply of uranium, much of which is in Canada, by an international authority such as the United Nations, was advocated yesterday by one of the scientists who helped create the atomic bomb.

Dr. H. A. Wilson, professor of physics at Rice Institute, who directed a series of successful experiments on a phase of the bomb's development leading to the use of uranium, in an interview last night described the atomic bomb as a destructive force of the most beyond imagination and said:

"I think some international authority should take control of the world's uranium supply to see that the destructive principle of atomic disintegrations does not fall into the wrong hands."

The Ultimate Responsibility

In a brief to the dominion-provincial conference, the federal government asks for the co-operation of the provinces in meeting current housing shortages and in drafting a permanent housing policy.

It is true that housing, as a national problem, is the one which has the widest Canadian, of provincial and municipal governments as well as of the dominion government.

But in asking the provinces for co-operation, the dominion can expect little more than advice, good will and subsidiary measures to expedite the housing program. For the very essence of an adequate housing program is financial and only the dominion government can solve the difficulty there.

The brief says, in part: "As competing war demands take off and finally disappear and as the concerted effort of the government to provide materials to construction bring forth the rate of building will accelerate."

One can only hope that Ottawa is waiting for time alone to adjust housing conditions in this country, thousands of servicemen and other Canadians might well make up their minds to be homeless this winter.

By no stretch of the imagination will Canadians be content to allow natural adjustment in the building market to take responsibility for building modern low-rental homes.

The fact is that the only way to get modern low-rental houses is to build them. And they cannot be built to rent at \$18 to \$25 per month which is the top rate most Canadians can pay, without somebody taking a loss.

The only agency that can possibly take the lead in this is the federal government. It must take it through the employment of interest-free national credit.

Only the dominion government can make such interest-free funds available on modern low-rental houses. Therefore the ultimate responsibility for housing lies solely with the dominion government.

With Tact and Efficiency

The retirement of Robert Pearson, on August 31, as chief motion picture censor for Alberta will be deeply regretted by all who are acquainted with the nature of his work because it is unanimously agreed that Mr. Pearson for 17 years has performed a difficult and delicate task with eminent satisfaction by the public.

A motion picture censor is not largely in the public eye. His work is not signed with a flourish. Indeed, the summit of his success is achieved when his activities are not discernible at all.

And yet, with imagination, judgment and a deep sense of the responsibility which must maintain constant guard over a form of entertainment and education which has profound effect on the public mind. Too little censorship might do harm to public thinking. Too much censorship can ruin art.

With tact and efficiency, Mr. Pearson has steered an amazingly effective course between the two.

It will be exceedingly difficult to find another censor who will equal Mr. Pearson's work. Very careful consideration should be given to the choice of his successor.

Alcoholic Paradox

A Toronto magistrate has decided that a man lolling in a drunken sleep over the wheel of his stationary automobile could not be convicted of driving drunk in charge of an automobile because he "was so intoxicated that he was incapable of having control of a motor car" within the meaning of the act.

This is an interesting decision because, in one form or another, it has been rendered by magistrates in Canada and in the United States. Apparently this means that so long as an inebriate can keep one eye open and go through the motions of driving, he can be convicted. But if he takes the last drink that paralyzes him, he is not "in care and control" of the vehicle and cannot be fined or jailed.

It is a droll sort of legal paradox which, in making it an offence to drive a car while drunk, allows rule that while a partly drunken man is guilty, a totally drunken man is innocent.

The situation has the absurdity in fact as well as in law. For there does come a time, of course, when the alcoholic goes beyond to lift and the driver is guilty. Once able to move a finger he is guilty again under the law and may be arrested. It seems ridiculous that the police should have to wait until a driver is driven driver to awake before they can take him into custody.

Please Speak English

It is presumed that the enunciation and pronunciation of Canadian radio and television are governed to a greater or lesser degree, by the prescriptions of the Canadian Broadcasting Corporation. That is to say, general and detailed rules are laid down which are varied and amended, of course,

according to the fancy of individual stations.

One sometimes shudders to think what the habits of pronunciation and enunciation on the air are doing to Canadian speech.

It is best, perhaps, to pass over quickly the general nastiness of radio delivery. Some announcers, trying to be precise, achieve only a pained saccharinity in a too sweetly emasculated of all individuality.

But it is in pronunciation that the direct sins are committed. Our old friend "Bouloune" has been a victim of radio delivery. One recalls, however, with horror the CBC prescription that this hapless place should be called "Bouloune," a pronunciation that exists neither in French, in English, in heaven nor on earth. In English it is "Bulone." In French it is "Bouloune."

This particular infirmity has been inspired by recent broadcasts which refer to Prague as "Praag." The word in English is "Prague" and is pronounced "Praag." In Germany it is "Prag" called "Praag." In Czech it is "Praha."

Why do our radio announcers have to speak German?

On the same Saturday night broadcast which revived "Praag," the esteemed Canon C. F. A. Clough was called "Canon Clo." The word in English is "Clough," in English, in heaven nor on earth. In English it is "Bulone." In French it is "Bouloune."

Why do our radio announcers have to speak German?

Poincare Is Not the New World

By DOROTHY THOMPSON
An article recently published by Sumner Welles called forth some comments. This is the first time that Mr. Welles has answered in his own words the criticism which he has invited.

By making repeated reparations demands, which Germany could not possibly fulfill, Poincare believed he could bring about the imposition of a punitive peace. France would place France in control of important wide areas of German territory.

It is this Poincare policy which Sumner Welles has called the "policy of the tribune of 'penetration'." He assumes that I knew that this was the real French policy.

As a matter of fairness, in my journalistic career, I have always given governments the benefit of doubt, whatever my suspicions. I certainly suspected that, in the 1920's, France wanted to dominate Europe in violation of the spirit of the treaty, not the letter. The spirit was infused into the British by Woodrow Wilson, who highly valued the preservation of peace and who insisted that national principles be maintained.

Now, in the new and weak German democracy, there is no doubt that the treaties were being carried out. France was not making reparations—unlike what Mr. Welles so candidly said—used to give rise to the belief that this country could entertain a policy having as its objective the disintegration of Germany.

Therefore, of course, it is well aware of the constant efforts of German propaganda to drive wedges between the British and the United States. It is disturbing to have a public statement dignifying it by refutation would be to deprecate the efforts of the British and the United States.

Finally, in more positive vein, let me say that the British and the United States are not in the first three points of the Atlantic Charter. The British and the United States are not in the first three points of the Atlantic Charter.

Not contenting Dr. Bruce with his criticism, Mr. Welles has written a long article in the British newspaper with fulminations. That my opinion 1943.

Dr. Goebbels and his associates is such that I do not wish to give rise to the belief that this country could entertain a policy having as its objective the disintegration of Germany.

Two points will strike Canadians. The first is the statement that the British and the United States are not in the first three points of the Atlantic Charter.

The second point is the statement that the British and the United States are not in the first three points of the Atlantic Charter.

Dr. Goebbels and his associates is such that I do not wish to give rise to the belief that this country could entertain a policy having as its objective the disintegration of Germany.

Albert Brief Is Submitted To Conference

Continued from Page Five

With the outbreak of war in 1939 the Dominion government was confronted with the task of financing a national war effort on an unprecedented scale. For this purpose the sought and obtained from the provinces the exclusive right to levy income and corporation taxes for the duration of the war in return for fixed and guaranteed annual payments.

TAXATION
During the war, despite the fact that direct and indirect taxation have been increased to their maximum limits, the Dominion has accumulated a national debt, the servicing of which already requires more than twice the present annual revenue of the four provinces combined. In addition, the Dominion government has accumulated obligations for war reconstruction schemes, family allowances, subsidies, service pensions, etc., which in the aggregate amounted to call for an annual expenditure in excess of its entire pre-war tax revenue. These items do not take into account the ordinary peace-time expenditures for which the Dominion government is obligated and which in pre-war years absorbed the entire income of the federal treasury.

The crisis in our national economy and in Dominion-provincial relations which has been developing steadily as a result of growing difficulties, now has been brought to a head by the stern demands of the post-war period with which the Dominion and the provinces alike are confronted.

With the final cessation of hostilities, and the expiration of the present Dominion-provincial tax agreements, the provinces face a situation which will be faced by the Dominion in maintaining great expenditures for social services, good the depreciation of public highways, buildings, etc., which have accumulated during the war in addition discharging their obligations in an adequate manner of post-war rehabilitation and development. Under present circumstances the provinces will be forced to rely upon the limited revenues which they can derive from taxation and from further borrowing in order to discharge their responsibilities. Moreover, the Dominion tax and corporation tax have in the past two important fields of provincial revenue, but both have been invaded by the Dominion to an extent which, if continued after the expiration of the Dominion-provincial tax agreements, will for all practical purposes nullify the provinces constituted right to derive revenue by means of direct taxation in these fields.

NO SOLUTION
To suggest that the Provinces meet their post-war needs by means of large scale public borrowing obviously is no solution to the problem but rather a transfer into the future with increasing certainty that the results will be more disastrous than they are now. Obviously the present situation is a deadlock and the Dominion and municipal governments in an interlocking position.

The whole situation resolves itself down to the one indisputable fact that the major problem confronting all Governments today is primarily financial and insofar as provincial and municipal governments are concerned, it is absolutely impossible for them to discharge their post-war responsibilities within the confines of the Constitution and the laws of Canada unless the necessary additional revenue is made available to them.

It is not a problem of scarcity of resources or of lack of machine power, man power or ability to transform those resources into any conceivable form of goods necessary to meet the post-war requirements of the Canadian people. It is not a question of physical inability to train men and women in the post-war years to render efficiently every conceivable private and

NAZIS HAD THIS UP THEIR SLEEVE.—Another "secret weapon" the Germans had "in the works" before war's end is the odd-looking projectile pictured above. Devised by Professor Wagner, former chief Junker aircraft designer, the projectile, called the "Schmetterling," is a radio-controlled bomb believed capable of speeds up to 800 miles an hour, with a ceiling of 50,000 feet. It was intended for use against Allied planes. The one pictured above was built of parts found in a factory at Nordhausen, where mass production was about to start when Germany surrendered.

public service necessary to the good and welfare of mankind. History has demonstrated that in times of peace, under our present economic conditions, the fact that limits both the individual's standard of living and the measure of social and public services provided by the state is financial rather than physical. Until this absurd situation is corrected by an amount of retooling of our responsibilities or of our inadequate revenues, we cannot solve our problems and ensure the people of Canada a postwar economy in which their standard of living and the measure of their social services will be limited by the scarcity of their material resources and their combined ability to produce the goods and services they require.

JURISDICTION, RESPONSIBILITY
It is not so much a seemingly complex problem of the jurisdiction of the Dominion-Provincial tax agreements, but rather a relatively simple in origin and stem from a violation of fundamental principles. Like present difficulties in Dominion-Provincial relations, the problem is relatively simple in origin and stem from a violation of fundamental principles. Like present difficulties in Dominion-Provincial relations, the problem is relatively simple in origin and stem from a violation of fundamental principles.

ACTUAL FACT
In actual fact, while with respect to certain matters the Dominion has the means and the constitutional authority, the provincial Governments are constitutionally responsible for the consequences of the Dominion's actions. With respect to taxation and with respect to services which the provinces must assume full constitutional responsibility they are denied the means to do so. The Dominion's constitutional authority—necessary to enable them to discharge these responsibilities. Section 32 of the BNA Act gives the Provinces exclusive jurisdiction over property and civil rights, but experience has shown that the Provinces' authority in this field is largely nullified by the fact that the Dominion Government has exclusive jurisdiction in matters affecting interest and bankruptcy.

It was brought out forcibly during the pre-war depression years when under the stress of economic conditions many western Canadian provinces were unable to meet their debt obligations resulting in wholesale foreclosures at depressed land values by lending corporations. It was the Dominion's failure to provide the provinces with the necessary funds to meet their obligations, and the Dominion's failure to provide the provinces with the necessary funds to meet their obligations, and the Dominion's failure to provide the provinces with the necessary funds to meet their obligations.

Of particular importance is the fact that the Dominion Government enjoys exclusive jurisdiction over banks, banking and the issue of money, together with the regulation of trade and commerce. This gives the Parliament of Canada complete jurisdiction over the monetary and economic policy, but it is the Provinces that are constitutionally responsible to provide the necessary relief and other financial assistance required by those who find themselves unemployed and destitute as a result of a repressive monetary policy imposed or permitted by the Dominion Government.

District News in Brief

STETTLER.—Word has been received by the Rev. T. H. Chapman that his son, P.O. Harold E. L. Chapman, reported missing during the last April, has been presumed dead. The son was born in Nova Scotia and educated at Lacombe and Stettler. Prior to enlisting he served in the Royal Canadian Mounted Police. He was killed on September 19, 1942, at Stettler, Alberta. His wife, Mrs. Marion and Joyce, reside in Calgary.

THREE HILLS.—Alfred Cassin of Three Hills and Carson, died of cancer at the age of 83 years. He came west to Calgary in 1888 and resided at Stettler and Three Hills. He was buried in the Three Hills cemetery.

PONOKA.—Mrs. Laura Jones, wife of Mayor R. H. Jones of Ponoka, died at her home Saturday after a lengthy illness. She was born at North Wales in 1887 and came here with her husband in 1912. She was buried in the Forest Home cemetery, Ponoka.

ST. PAUL.—Dana, one of the first settlers of the Lake Eliza district, died last week after a lengthy illness.

THREE HILLS.—A cloudburst struck this town during the week-end, turning streets into veritable rivers. It is a matter of minutes before the water is gone. Power lines were blown down and electric lights were out. A head of cattle, owned by S. Rauer, were killed by lightning.

PONOKA.—J. F. Gordon, publisher of the Ponoka Herald is covering in the Lacombe hospital from an operation. His condition is regarded as favorable.

PONOKA.—Price lists are now being distributed for the annual flower show this month, sponsored by the Ponoka Fair.

RED PASS JUNIOR.—Miss C. Fisher, a former private secretary to Winston Churchill, returned from overseas last week. She is travelling to the coast and visiting a short time at Lacombe and Stettler. Prior to enlisting he served in the Royal Canadian Mounted Police. He was killed on September 19, 1942, at Stettler, Alberta. His wife, Mrs. Marion and Joyce, reside in Calgary.

THREE HILLS.—Alfred Cassin of Three Hills and Carson, died of cancer at the age of 83 years. He came west to Calgary in 1888 and resided at Stettler and Three Hills. He was buried in the Three Hills cemetery.

PONOKA.—Mrs. Laura Jones, wife of Mayor R. H. Jones of Ponoka, died at her home Saturday after a lengthy illness. She was born at North Wales in 1887 and came here with her husband in 1912. She was buried in the Forest Home cemetery, Ponoka.

ST. PAUL.—Dana, one of the first settlers of the Lake Eliza district, died last week after a lengthy illness.

THREE HILLS.—A cloudburst struck this town during the week-end, turning streets into veritable rivers. It is a matter of minutes before the water is gone. Power lines were blown down and electric lights were out. A head of cattle, owned by S. Rauer, were killed by lightning.

PONOKA.—J. F. Gordon, publisher of the Ponoka Herald is covering in the Lacombe hospital from an operation. His condition is regarded as favorable.

YOU'RE IN THE ARMY NOW.—All right, what if it isn't grade A—it sure beats that powdered milk!

YOU'RE IN THE ARMY NOW.—All right, what if it isn't grade A—it sure beats that powdered milk!

Alberta

By Capt. HARPER PROWSE, M.L.A.

The special session of the Alberta legislature two weeks ago the government gave the green light to a plan to provide Alberta veterans with farms which they can own without going into debt or having to pay any interest on loans.

Within the next few weeks bondholders should be having clearing the first 100,000 acres of specially selected land in the Peace River country, and by next spring the first veteran-soldiers should be receiving new, clean half-section farms.

Veterans who take advantage of this scheme won't have to start out with a load of debt, they won't have to worry about making payments in Jean years, and they won't be tied down with a contract requiring them to pay to many dollars or so much interest before they can take title to their farms. They won't have to pay taxes until they own them. They will, if the scheme works out the way it is planned, be getting the kind of a break they didn't even dare dream about.

Veterans who qualify under the scheme—that is, satisfy the government authorities that they are capable farmers—will be placed on one of several new farms under the following conditions:

TEST SOILS
Government officials of the department of agriculture will test the soils and will outline what they believe to be a proper crop rotation program for each farm. The veteran agrees to farm the land according to this direction. In payment for it he will pay to the government one-third of his crop for seven years. Then he can do as he pleases.

During this seven-year he will not be responsible for any taxes. If he has a bad year his government will still one-third of the crop—the government shares that risk with him. If it is a bumper crop he pays one-third—the government shares his good fortune with him.

If he cares to wait ten years before he can do as he pleases.

ALBERTA NOT ASSOCIATION

The Alma Street You Every Day Cutting Corners Is Dangerous

Cut the corner at high speed and run into an accident? Cutting corners is not only muggy dangerous business but it's absolutely against the law. Take your time—turn the corner in the middle of the intersection.

ROAD REPORTS

All roads north of the city are reported in good condition, and weather clear with the exception of Burnside, Lac la Poudre and Wainwright, where roads are rough. They are also rough at Wainwright, and at Thorley. Other roads west and east of the city are OK.

AT LAST!

In clearing due attention will be paid to leaving trees and natural growth. It will be cleared in blocks of not less than 10,000 acres, and it is intended that each quarter section will land of about 160 acres of cleared land, with the rest left to provide windbreaks, etc.

The contractor provides the equipment and cash and agrees to provide the labor and the preference given to veterans. In payment he receives one-third of the crop for the first seven years. The value of this crop does not repay him for the cost of the land. He agrees to put up the difference, to a maximum of \$14 per acre, plus five per cent interest.
